Choose the best response for each question. Then select **Check your answers**.

1. Which of the following is an accessible link? *

○ `<a href="https://www.microsoft.com">https://www.microsoft.com</a>`

◉ `<a href="https://www.microsoft.com">Microsoft</a>`

✔ **Providing a few words to describe where the link will take the user is accessible link text.**

○ `<a href="https://www.microsoft.com/>Click here</a>`

2. Which of the following is an appropriate use of ARIA (Accessible Rich Internet Applications) attributes? *

○ To indicate to a screen reader that a `div` element is actually a `button` element.

○ To provide different text for a screen reader to speak when link text reads "click here."

◉ To give context to a screen reader when a control doesn't exist in semantic HTML, such as a tree.

✔ **ARIA attributes can provide context to a screen reader when you're creating custom controls that don't exist natively in HTML.**

3. To add a control that the user selects to perform an action, which HTML element should you use? *

◉ `div`

✘ **Although it's possible to make any control clickable, using `button` will ensure that your page is accessible.**

○ `span`

○ `p`

○ `button`

✔ **Use `button` to ensure that your page is accessible.**
